Statement of purpose. *Biology Digest* organizes, summarizes, and indexes worldwide scientific literature in the life sciences. It is designed to assist students and educators at the secondary school and undergraduate college levels in keeping current on the latest scientific developments and in performing special research projects.

Method. The staff of *Biology Digest* screens some 200 periodicals, foreign and domestic, looking for significant new information relevant to the biological sciences. This material is summarized, organized into chapters, and indexed by subject and author.

Abstracts. The abstracts or "digests," which are up to 325 words long, give as much information as possible about the original material, including conclusions and methods. The idea is to enable students who may not have ready access to the original documents to understand and keep current on the latest biological research. Each issue of *Biology Digest* contains approximately 350 abstracts.

Citation numbers. Abstracts are numbered sequentially through the entire volume. The first four characters represent the academic year of the volume, and the four characters following the hyphen represent the abstract identification number—96/97-0001, 96/97-0002, 96/97-0003, etc.

Keyword Index. Each abstract is assigned certain keywords that spotlight the main points of the article. Each keyword becomes an "entry" in the keyword index which refers the reader back to the appropriate abstract. The indexing technique used in *Biology Digest* is called "free-language," which means that the keywords chosen to represent each article are not restricted to a thesaurus or master list of keywords but rather picked to conform to the language in the original material itself.

Author Index. Each issue contains its own author index to facilitate locating research performed by a particular scientist.

Feature Articles. Each issue contains a special authoritative feature article on some particular area of biological research. Additional copies of feature articles are available for a nominal fee. See pages viii and ix for a list of past feature articles and pricing information.

Master list of publications. Publications received regularly and cited in *Biology Digest* are listed in the front of each issue.

Abbreviations and symbols. Alphabetical listings of abbreviations and symbols appear in each issue.

Subscriptions. *Biology Digest* is published monthly, September through May. A subscription to Volume 23 for the 1996-97 school year is $129 ($139 for foreign subscriptions). All subscriptions are for a full volume (nine issues), and the Cumulative Index. New subscribers automatically receive any issues already published in the current volume. Second subscriptions to the same address are available at a special reduced rate of $99. Single copies of *Biology Digest* issues may be ordered prepaid for $12 each. A limited number of back volume sets also are available—Volumes 5, 6, 7, and 8 at $79 ($85 for foreign subscriptions), 9, 10 and 11 at $89 ($95 for foreign subscriptions), 12 and 13 at $95 ($101 for foreign subscriptions), 14, 15, and 16 at $99 ($105 for foreign subscriptions), and 17, 18, 19, 20, 21 and 22 (which include the Cumulative Index), at $125 ($130 for foreign subscriptions). Payment must accompany all subscription orders from outside the U.S. and Canada.

Cumulative Index. To facilitate research, an integrated cumulative index containing both keywords and author references is published at the end of the volume year. The Cumulative Index to Volume 5 (1978-79) and Volume 6 (1979-80) are $18.50 each. Volume 7 (1980-81), Volume 8 (1981-82), Volume 9 (1982-83), and Volume 10 (1983-84) are $19.50 each. Volume 11 (1984-85) and Volume 12 (1985-86) are $22.50 each, and Volume 13 (1986-87), Volume 14 (1987-88), Volume 15 (1988-89), and Volume 16 (1989-90) are $25.00 each. Beginning with Volume 17 (1990-91), the Cumulative Index became an automatic part of a subscription to *Biology Digest*. Cumulative Indexes for Volumes 17, 18, 19, 20, 21 and 22 are available, however, for purchase at $25 each.
